## NOTES

### **LG Notes:**

-Some older LG models do not allow outgoing calls if the user is operating the mobile's menu. It is advised to leave the mobile on the home screen when connecting to the vehicle for hands-free use.

### **Nokia Notes:**

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.

- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.

### **Samsung Notes:**

- Some older Samsung models do not allow outgoing calls if the user is operating the mobile's menu. It is advised to leave the mobile on the home screen when connecting to the vehicle for hands-free use.

\* Available function in some SEAT models.

The mobile that appear on this list can connect and function in hands-free mode, with different restrictions to operation depending on the model.

Warning: The use of earlier software versions can affect the operation of your mobile. It is recommended to always update your mobile to the latest software available from your mobile phone manufacturer. Ask for a current or later version.

In some mobiles with Android O.S. it is necessary to accept the request for access to your contacts (PBAP) when connecting to use your call list.

This list does not include possible changes made by the mobile phone manufacturer that can affect operation.

Some mobiles automatically use the phone's standard ring tone in hands-free mode (over the vehicle's speaker system). If the telephone is in silent mode, it is possible that the tones will not ring when using the hands-free function. It is recommended to always configure an audible ring tone.
