- 88. DATE OF MANUFACTURE BEFORE  
MARCH 16<sup>TH</sup> 2009

# NOTES

## Compatibility of Bluetooth phones with hands free system MEDIA SYSTEM TOUCH / COLOR

### Hands Free:

- / **Attention:** This system does not support the downloading of images for contacts.
- / **Attention:** In the case of sporadic Bluetooth connection problems, restart the mobile device and try to reconnect it.
- / After connecting, the mobile phone may display different access requests to the agenda and/or call lists. If these types of requests are not accepted, certain information may not be displayed or may be incomplete. It is recommendable to select the option "always" for future reconnection, agenda access requests, access requests for messages, etc...
- / Some devices display the different requests mentioned in the point above, after each connection, which is why it is important that the user be on the lookout for this type of message on their mobile phone. Copying your contacts from the SIM card to the memory of the phone in order to avoid incompatibilities with agenda downloads is recommended.
- / Some mobile telephones incorrectly transfer the call time due to their configuration of Date/Time (Time Zone/Daylight Savings/...) and the level of firmware they have.
- / On some devices, if the incoming call is accepted from the mobile phone when it is connected to hands free, the call goes into private mode (the audio is transferred from the Bluetooth car system to the mobile phone). It is possible to transfer the audio back to the hands free car system manually from the radio/ browser or from the phone itself.
- / In order to connect a new mobile phone, it is recommended that the search for BT devices be done only from one of the devices (whether that be the mobile phone or the radio). If it is done from both at the same time, the devices trying to connect may not be able to.
- / **Attention:** Using older versions of mobile phone software could restrict its functioning or cause sporadic connection drops in Bluetooth. Always updating your mobile phone to the latest version of software is advisable. For more information, visit the website of your mobile phone's manufacturer.

### BT Audio:

- / Some devices do not start to make sound right after connecting to BT audio and selecting it as an active source, so it is necessary to play audio directly on the mobile or have the mobile audio player open during the connection. Also, on some devices it is necessary to restart BT audio manually after a call.
- / As playing audio in Audio BT mode is still compatible, certain functions such as rewind and fast forward, as well as the presentation of information available on the artist, title, album, song duration, etc... will be available in function of the compatibility of the music application used.
- / The options MIX/REPEAT ALL/REPEAT TRACK, may have limitations on their functionality depending on the mobile utilized.
- / In some cases, brief connection drops in the BT audio have been detected due to poor BT reception or during agenda downloading. Keeping the mobile to short distances and free of obstacles is recommended.
- / On some mobiles, when they are connected to BT audio and they disconnect from the radio, they continue playing music through their own loudspeaker.
- / Some mobiles may have brief Audio BT connection drops when receiving message notifications from other applications (WhatsApp, SMS, Facebook, etc...)
- / Audio BT tests have been done with the default application of each telephone manufacturer. SEAT assures described behaviour only with these applications.

## Compatibility of Bluetooth phones with hands free system MEDIA SYSTEM PLUS / NAVI SYSTEM

### Hands Free:

- / **Attention:** In the case of sporadic Bluetooth connection problems, restart the mobile device and try to re-connect it.
- / After connecting, the mobile phone may display different access requests to the agenda and/or call lists. If these types of requests are not accepted, are not accepted, certain information may not be displayed or may be incomplete. It is recommendable to select the option "always" for future reconnection, agenda access requests, access requests for messages, etc...
- / Some devices display the different requests mentioned in the point above, after each connection, which is why it is important that the user watch for this type of message on their mobile phone.
- / Copying all contacts from the SIM card to the memory of the phone in order to avoid incompatibilities with agenda downloads is recommended.
- / Some mobile telephones incorrectly transfer the call time due to their configuration of Date/Time (Time Zone/Daylight Savings/...) and the level of firmware they have.
- / On some devices, if the incoming call is accepted from the mobile phone when it is connected to hands free, the call goes to private mode (the audio is transferred from the car's Bluetooth to the mobile phone). It is possible to send the audio back to the hands free car system manually from the radio/browser or from the phone itself.
- / In order to connect a new mobile phone, it is recommended that the search for BT devices is done only from one of the devices (whether that be the mobile phone or the radio). If it is done from both at the same time, the devices trying to connect may not be able to.
- / If you do not have access to the contacts agenda, disconnect and try to re-connect the mobile device.
- / **Attention:** The compatibility of photo downloading related to contacts has been done for stored contacts in the internal memory of the telephone.
- / **Attention:** The use of older mobile phone software versions could restrict its functioning or cause sporadic connection drops Bluetooth. Always updating your mobile phone to the latest version of software is advisable. For more information, the website of your phone's manufacturer.

### BT Audio:

- / Some devices do not start to make sound right after connecting to BT audio and selecting it as an active source, so it is necessary to play audio directly on the mobile or have the mobile audio player open during the connection.
- / As playing audio in Audio BT mode is still compatible, certain functions such as rewind and fast forward, as well as the presentation of information available on the artist, title, album, song duration, etc... will be available in function of the compatibility of the music application used.
- / The options MIX/REPEAT ALL/REPEAT TRACK, may have limitations on their functionality depending on the mobile utilized.
- / In some cases, brief connection drops in the BT audio have been detected due to poor BT reception or during agenda downloading. Keeping the mobile to short distances and free of obstacles is recommended.
- / On some mobiles, when they are connected to BT audio and they disconnect from the radio, they continue playing music through their own loudspeaker.
- / Some mobiles may have brief Audio BT connection drops when receiving message notifications from other applications (WhatsApp, SMS, Facebook, etc...)
- / Audio BT tests have been done with the default application of each telephone manufacturer. SEAT assures described behaviour only with these applications.

- ✗ Not available

# NOTES

## SMS:

- / Some telephones do not support messages with uncommon characters (emoticons or symbols).
- / The SMS function of the radio will only display short text messages (SMS). Multimedia messages, or those with attached content (MMS) will not be displayed.
- / In no case will it be possible to erase an SMS through this Radio model.
- / Some telephones do not correctly order the messages in the SMS folders (Received, send, deleted...etc).
- / The messages with contact information, sent through the browser's text message function ("Messages/Send contact information") will be shown in text format. (vcard).

## Compatibility of Bluetooth phones with hands free system MEDIA SYSTEM PLUS / MEDIA SYSTEM 2.2

- / \* Function available in some SEAT products. As playing audio is still compatible in Bluetooth Audio Streaming mode, certain functions such as rewind and fast forward, as well as the presentation of information available on the artist, title, album, song duration, etc... will depend on the level of compatibility between the mobile and the application used.
- / Mobiles that appear in this list connect and function with hands free, with variable restrictions to their functioning.
- / Attention: The use of older software versions can restrict functioning. Always updating your mobile to the latest software version is advisable. For this, request a software update for your mobile telephone from the technical service of your telephone's manufacturer. Request an equal or superior version.
- / On some mobiles with S.O. Android, agenda access request (PBAP) must be accepted during connection in order to manage access to the telephone agenda.
- / Possible deviations from phone manufacturers are not included in this list as they could restrict functioning.
- / Some phone switchboards use the default melody on the mobile phone for the hands free ring (through the vehicle's speakers). If the telephone is on silent, you may not hear any tones in hands free mode. Setting up an audible melody is recommended.

Notes Nokia:

- Some Nokia phones with S.O. S60 (3<sup>rd</sup>) or Symbian^ 3, in function of the Firmware version that they have, do not correctly transfer audio when making incoming or outgoing calls after reconnecting. Updating the mobile's Firmware to the latest status available from Nokia is recommended.
- On some NOKIA devices with S.O. Symbian (S40) will disconnect from the vehicle's BT when a call is changed from active to private mode. Once the call has finalized, Symbian automatically reconnects.
- On occasion, the correct functioning of the BT Audio controls (fast forward and rewind) depends on the music application used.
- With LUMIA mobiles it is not recommended to have the screen "Bluetooth Configuration" open while Bluetooth Audio is active.

Notes BlackBerry:

- If when trying to re-import contacts manually, nothing happens, restart the mobile telephone by shutting it off and turning it back on.
- Mobiles with software inferior to V7.1.X ask for permission on the mobile after each connection.
- Access to music folders in the Media Browsing option can have some delays in the Q and Z series models.

Notes Nokia:

- Some Nokia phones with S.O. S60 (3<sup>rd</sup>) or Symbian^ 3, in function of the Firmware version that they have, do not correctly transfer audio when making incoming or outgoing calls after reconnecting. Updating the mobile's Firmware to the latest status available from Nokia is recommended.
- On some NOKIA devices with S.O. Symbian (S40) will disconnect from the vehicle's BT when a call is changed from active to private mode. Once the call has finalized, Symbian automatically reconnects.
- On occasion, the BT Audio controls (fast forward and rewind) do not work at all.
- With LUMIA mobiles it is not recommended to have the screen "Bluetooth Configuration" open while Bluetooth Audio is active.

Notes SAMSUNG:

- On some mobiles, it is necessary to accept from the mobile, before sending an SMS.
- The results of these lists for Bluetooth Audio Streaming only take into account functionality with the default SAMSUNG application.
- On some Samsung models with Android prior to KitKat (4.4.2), the song duration may not be displayed correctly.

Notes Apple: - If an incoming call is taken manually on Apple iPhone models when it is connected to the hands-free, it is switched to a private call (i.e. no sound goes through the car's Bluetooth function). You can switch the incoming call to hands-free manually, using the options on your mobile. - Some iPhone models do not correctly manage the PLAY/PAUSE on Bluetooth Audio Streaming.

Notes Nokia:

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.
- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.
- Some Nokia mobiles do not show the time according to the phone settings, but according to time zone, GMT+0. (You can configure the time on the mobile so that it does not use GMT+x and summer time).
- Nokia Lumias with Windows Phone may not be able to play Bluetooth Audio Streaming automatically when first linked. The recommendation is to manually disconnect/ connect the connection to make it work properly.
- On Lumia models, if the incoming call is accepted manually from the mobile when it is connected to hands free, the call becomes private (there is no audio through the Bluetooth car system). It is possible to send the incoming call to the hands free car system manually from the mobile's options.

Notes Samsung:

- Some older Samsung models do not allow out going calls if the user is operating the mobile's menu. It is advised to leave the mobile on the home screen when connecting to the vehicle for hands-free use.
- Some Samsung mobiles do not show the time according to the phone settings, but according to time zone, GMT+0. (You can configure the time on the mobile so that it does not use GMT+x and summer time).
- Some models may not correctly display song duration.

### Notes Apple:

- If an incoming call is taken manually on Apple iPhone models when it is connected to the hands-free, it is switched to a private call (i.e. no sound goes through the car's Bluetooth function). You can switch the incoming call to hands-free manually, using the options on your mobile.

**Notes Nokia:**

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.
- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.
- Some Nokia mobiles do not show the time according to the phone settings, but according to time zone, GMT+0. (You can configure the time on the mobile so that it does not use GMT+x and summer time).
- Nokia Lumias with Windows Phone may not be able to play Bluetooth Audio Streaming automatically when first linked. The recommendation is to manually disconnect/connect the connection to make it work properly.

### Notes Apple:

- If an incoming call is taken manually on Apple iPhone models when it is connected to the hands-free, it is switched to a private call (i.e. no sound goes through the car's Bluetooth function). You can switch the incoming call to hands-free manually, using the options on your mobile.

**Notes Nokia:**

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.
- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.
- Some Nokia mobiles do not show the time according to the phone settings, but according to time zone, GMT+0. (You can configure the time on the mobile so that it does not use GTM+x and summer time).

Notes Nokia:

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.
- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.
- Some Nokia mobiles do not show the time according to the phone settings, but according to time zone, GMT+0. (You can configure the time on the mobile so that it does not use GTM+x and summer time).

**Notes Nokia:**

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.
- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.

X7-00	✓	✓	✓	V021.013 Symbian Anna

Notes Nokia:

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.
- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.

**Notes Samsung:**

- Some older Samsung models do not allow out going calls if the user is operating the mobile's menu. It is advised to leave the mobile on the home screen when connecting to the vehicle for hands-free use.
